IN RE: Petitioner: [Redacted]
Beneficiary: [Redacted]

Petition: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act, 8 U.S.C. 1101(a)(15)(H)(i)(b)

Public Copy

IN BEHALF OF PETITIONER: Self-represented

Identifying data deleted to
prevent clearly unwarranted
invasion of personal privacy

INSTRUCTIONS:

This is the decision in your case. All documents have been returned to the office which originally decided your case. Any further inquiry must be made to that office.

If you believe the law was inappropriately applied or the analysis used in reaching the decision was inconsistent with the information provided or with precedent decisions, you may file a motion to reconsider. Such a motion must state the reasons for reconsideration and be supported by any pertinent precedent decisions. Any motion to reconsider must be filed within 30 days of the decision that the motion seeks to reconsider, as required under 8 C.F.R. 103.5(a)(1)(i).

If you have new or additional information which you wish to have considered, you may file a motion to reopen. Such a motion must state the new facts to be proved at the reopened proceeding and be supported by affidavits or other documentary evidence. Any motion to reopen must be filed within 30 days of the decision that the motion seeks to reopen, except that failure to file before this period expires may be excused in the discretion of the Service where it is demonstrated that the delay was reasonable and beyond the control of the applicant or petitioner. Id.

Any motion must be filed with the office which originally decided your case along with a fee of \$110 as required under 8 C.F.R. 103.7.

FOR THE ASSOCIATE COMMISSIONER,
EXAMINATIONS

Terrance M. O'Reilly, Director
Administrative Appeals Office

DISCUSSION: The nonimmigrant visa petition was denied by the director. A subsequent appeal was dismissed by the Associate Commissioner for Examinations. The matter is now before the Associate Commissioner on a motion to reopen. The motion will be granted and the previous decisions of the director and the Associate Commissioner will be affirmed.

The petitioner is a computer consulting firm which seeks to employ the beneficiary as a software engineer for a period of three years. The director determined that the petitioner had not established that the beneficiary qualifies to perform services in a specialty occupation.

On motion, the petitioner reiterates its argument that the beneficiary is qualified to perform services in a specialty occupation. The petitioner also argues that it complied with regulations as regards the filing of a labor condition application.

Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. 1101(a)(15)(H)(i)(b), provides in part for nonimmigrant classification to qualified aliens who are coming temporarily to the United States to perform services in a specialty occupation. Section 214(i)(1) of the Act, 8 U.S.C. 1184(i)(1), defines a "specialty occupation" as an occupation that requires theoretical and practical application of a body of highly specialized knowledge, and attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to section 214(i)(2) of the Act, 8 U.S.C. 1184(i)(2), to qualify as an alien coming to perform services in a specialty occupation the beneficiary must hold full state licensure to practice in the occupation, if such licensure is required to practice in the occupation. In addition, the beneficiary must have completed the degree required for the occupation, or have experience in the specialty equivalent to the completion of such degree and recognition of expertise in the specialty through progressively responsible positions relating to the specialty.

Pursuant to 8 C.F.R. 214.2(h)(4)(iii)(B), the petitioner shall submit the following with an H-1B petition involving a specialty occupation:

1. A certification from the Secretary of Labor that the petitioner has filed a labor condition application with the Secretary,
2. A statement that it will comply with the terms of the labor condition application for the duration of the alien's authorized period of stay, and

3. Evidence that the alien qualifies to perform services in the specialty occupation.

The petitioner has provided two certified labor condition applications. One was certified on January 28, 1999 while the other was certified on March 30, 1999. Both dates were subsequent to December 21, 1998, the filing date of the visa petition. Regulations at 8 C.F.R. 214.2(h)(4)(i)(B)(1) provide that before filing a petition for H-1B classification in a specialty occupation, the petitioner shall obtain a certification from the Department of Labor. Since this has not occurred, the petition may not be approved. The petitioner also filed a labor condition application on February 26, 1997. This application was not valid for the length of the beneficiary's proposed period of admission.

Pursuant to 8 C.F.R. 214.2(h)(4)(iii)(C), to qualify to perform services in a specialty occupation, the alien must meet one of the following criteria:

1. Hold a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
2. Hold a foreign degree determined to be equivalent to a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
3. Hold an unrestricted State license, registration, or certification which authorizes him or her to fully practice the specialty occupation and be immediately engaged in that specialty in the state of intended employment; or
4. Have education, specialized training, and/or progressively responsible experience that is equivalent to completion of a United States baccalaureate or higher degree in the specialty occupation and have recognition of expertise in the specialty through progressively responsible positions directly related to the specialty.

The beneficiary's foreign education has been found by an academic expert to be equivalent to a baccalaureate degree in English literature and a master's degree in English literature conferred by a United States college or university. The petitioner has not established that this education is relevant to the duties of the proffered position. Accordingly, it is concluded that the petitioner has not demonstrated that the beneficiary is qualified to perform services in a specialty occupation based upon education alone.

The beneficiary took several courses in various aspects of computer science. The petitioner has not demonstrated that the beneficiary's computer training is equivalent to an academic major field of study at a United States institution. The beneficiary's computer training has not been evaluated by a credentials evaluation service or academic expert.

The beneficiary had four years' employment experience at the time the visa petition was filed. The petitioner has not shown that the experience was experience in a specialty occupation or that it is sufficient to overcome the beneficiary's lack of a degree in a specialized and related field of study.

The beneficiary is not a member of any organizations whose usual prerequisite for entry is a baccalaureate degree in a specialized area. The record contains no evidence that the beneficiary holds a state license, registration, or certification which authorizes her to practice a specialty occupation. In view of the foregoing, it is concluded that the petitioner has not demonstrated that the beneficiary is qualified to perform services in a specialty occupation.

The term "specialty occupation" is defined at 8 C.F.R. 214.2(h)(4)(ii) as:

an occupation which requires theoretical and practical application of a body of highly specialized knowledge to fully perform the occupation in such fields of human endeavor, including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and which requires the attainment of a bachelor's degree or higher in a specific specialty, or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

1. A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
2. The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;

3. The employer normally requires a degree or its equivalent for the position; or

4. The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

The duties of the proffered position are described in pertinent part as follows:

Analyzes the client company's data processing requirements determine the computer software which will best serve those needs, then designs a computer system using that software which will process the client's data in the most timely and inexpensive manner, and implements that design by overseeing the installation of the necessary system software and its customization to the client's unique requirements.

The foregoing description is insufficient to establish that the proffered position is a specialty occupation. The duties are described in an abstract form with no indication as to their actual level of complexity. There is sufficient information to characterize the proffered position as essentially that of computer programming for business purposes with some entry-level analysis functions.

The petitioner has failed to establish that any of the four factors enumerated above are present in this proceeding. The petitioner has not shown that it has, in the past, required the services of individuals with baccalaureate or higher degrees in a specialized area for the proffered position. In addition, the petitioner has not shown that similar firms require the services of such individuals in parallel positions. The petitioner's actual minimum educational requirement appears to be a baccalaureate degree in any of a number of fields of study rather than a bachelor's degree in a specific and specialized area.

Positions in the computer industry are not clearly defined, in part, due to the relative sophistication and fast growth of the industry. Generally, positions in that industry are considered to fall within several groups: engineers (who may design the actual hardware used in computer systems); systems analysts (who may determine the needs of a process, select equipment, plan processing methods, and prepare specifications for programmers); and programmers (who, in turn, write instructions or programs for technicians).

The Service has found that the positions of systems engineer (and related engineering positions including designer), pure systems

analyst, and programmer of computers used for scientific or engineering applications are considered to be within the professions, as contemplated by section 101(a) (32) of the Act. The positions of programmer of computers used for business applications and technician, on the other hand, normally require training commonly gained and widely available outside of college or university studies. They are, therefore, usually not considered to be within the professions. (See the sections of the Department of Labor's Occupational Outlook Handbook (Handbook), 1998-1999 Edition on electrical and electronics engineers, computer systems analysts, computer programmers, and computer service technicians.)

The Handbook at page 108 indicates that while a baccalaureate degree is usually required, a degree in a specialized area does not appear to be a requirement. The Handbook states:

Employers using computers for scientific and engineering applications prefer college graduates who have degrees in computer or information science, mathematics, engineering or the physical sciences. Graduate degrees are required for some jobs. Employers who use computers for business applications prefer to hire people who have had college courses in management information systems ... and business, and who possess strong programming skills.

The petitioner has not shown why a position not considered a profession should be considered a specialty occupation. Additionally, the petitioner has not established that the proffered position is of such complexity that a baccalaureate degree in a specific specialty, as distinguished from familiarity or a less extensive education, is necessary for the successful completion of its duties. In view of the foregoing, it is concluded that the petitioner has not demonstrated that the proffered position is a specialty occupation within the meaning of regulations.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. 1361. The petitioner has not sustained that burden. Accordingly, the decisions of the director and the Associate Commissioner will not be disturbed.

ORDER: The order of September 2, 1999 dismissing this appeal is affirmed.
